

From Data to
Profitable Outcomes

ILLUSTRATIVE INDUSTRY CASE STUDY | UAE / GCC

ECOMMERCE

From GMV Growth to Profitable Growth

UNIFIED DATA. SMARTER INSIGHTS.
STRONGER PERFORMANCE.

Growth was visible. Profitability wasn't.

A UAE-based omnichannel ecommerce business generating approximately AED 420M in annual GMV was growing 18% YoY across marketplaces, direct commerce and digital channels. Yet contribution margin had fallen from 11.8% to 9.6%.

The challenge was not a lack of data. It was fragmented information across multiple data sources, making it difficult to connect marketing spend, discounts, returns, fulfillment costs, payment fees and inventory performance into one trusted management view.

EXECUTIVE ASKS

“Which categories are growing GMV but reducing contribution margin after marketing spend, discounts, returns, payment fees and fulfillment costs?”

DAOne connects the dots.

DAOne is a one-stop secure solution, configured and customized for your Data, Analytics and Reporting needs.

It brings information from multiple data sources together, reconciles the underlying data and turns an executive question into answers, dashboards, tabular analysis and management reports — including your existing report formats.

The analysis highlighted that just three category-channel combinations were responsible for 68% of margin deterioration.

From insight to profitable action.
